

Please protect our families from the further degradation of basic decency standards on broadcast media. Sexually suggestive and violent material is rampant in much of today's media, particularly primetime television. Do not allow nudity of any kind, vulgar/filthy language, and extreme violence to be shown on the basic channels most people have in their homes. Our children, all teenagers/young adults has mostly turned away from mainstream TV because of a lack of quality entertainment free of sexually suggestive content. Please help provide our family a place to find quality and uplifting entertainment.
